Dear sirs, I want to express my opinion on those who believe that Denise is no longer alive.

Everyone is free in their thoughts and personal opinions, unless they go to harm or affect the lives of others.

I appeal to those who think or believe that Denise is dead: no one has the mathematical certainty that Denise is alive, but even the security ATTENTION dell'opposto.

It 'important to know that behind every death there are stories and investigations for each situation. It is understood that the case of my daughter who is only rarely, for the manner and for the events that have generated.

Also this is not a "disappearance" (used as a generic term) but to a kidnapping, an event that is arisen from the presence of an adult that Denise has deprived of his freedom and led her away from his parents.

Psychologically, and that with some systematic way, we tend to think that when the person has disappeared for a long time, and then have passed years of silence, it should automatically be dead.

Apart from the statistical analysis of cases of missing persons in general would seem to indicate that this hypothesis is also true that many cases were successful. Persons unavailable at some time have reappeared.

The common thought and thus the underlying statistics, where they are not accompanied by a survey that shows the death of the deceased were not confirmed in any way a negative outcome of the case.

Despite the constant pain that has afflicted us for years for fear of not more Denise review, we have the strongest hope and belief that Denise is alive.

In the investigations conducted so far, no confirmation of the death of the child, but for various reasons we focus on the possibility that it is still alive, and I personally I am convinced.

My heart and also the reason I say that Denise is alive.

Denise trying to stop only when there is a tangible confirmation that she is no longer alive.

L 'goal is finding my child and also the search for truth and justice for her. In this sense, perhaps we can also help the children living the same tragedy.

Denise needs to go home in one way or another, and people who committed this heinous and abominable crime, they must pay for what they did. On this there will never the end.
